guess (ges), *a. dial.* Also guest, guessed. [Cf. LG. *güst* of the same meanings.] Of a cow or ewe: Barren; temporarily barren (see quots.). Also, not yielding milk.

guess (ges), *v.* Pa. t. and pa. pple. guessed (gest). Forms: 4 gesce, gese, gessen, 4–7 gess(e, 5 gessyn, 5–7 ges, (6 geasse), 6–7 guesse, 6–8 ghess(e, 6– guess. *Pa. t.* and *pa. pple.* (contracted forms) 4–5 gest, 6 ghest, 6–8 guest. [ME. *gessen*, cognate with the synonymous MLG., MDu. and mod.Du., Fris. *gissen* (MDu. also *gessen*, NFris. *gezzen*, *gedsen*), MSw. *gissa*, *gitza*, Sw. *gissa*, MDa. *gidze*, *gitse*, *getze*, Da. *gisse*; mod.Icel. has a derivative form *gizka*.

The relation between the various forms is obscure. According to Tamm *Svenskt Etym. Ordb.* the Scandinavian forms are adopted from LG. *gissen*, a phonetic alteration of *gessen* (cf. LG. *hissen*, var. of *hessen*, a. HG. *hetzen* to hunt). It seems, however, more probable that the Sw. and Da. forms are native, as the Eng. word can hardly be referred to any other than a Scandinavian source. The word cannot well descend from an OE. form = LG. *gissen*, as the initial would then have been *y* (ME. ȝ). The only remaining possibility would be that it was adopted from continental LG., but there is nothing in the nature of the meaning to account for its having come from that source in or before the early 14th c. The forms may represent one, or prob. more than one, of the OTeut. types **gitisôjan*, **gatisôjan*, **gessôjan*, **gissjan*; in any case the word is a derivative of the root of GET *v.*; cf. ON. *geta* v., to get, guess, *geta* wk. fem. a guess.

In the 14th c. the word was the usual rendering of L. *æstimare*, the influence of which probably affected some of the early senses.]

According to Brugmann, the synonymous Gr. *ξ-énos* is from **gh's-*, wk. grade of the root **ghos-* represented in the Teut. word.

According to phonetic law as at present understood, the initial consonant in the OE. word must have had a palatal pronunciation, which would normally yield ME. *ȝ*, mod.Eng. *y*. No forms with *ȝ* or *y* are, however, known to exist; the abnormal guttural pronunciation is usually explained as due to the influence of ON. *gest-r*; but the occurrence of hybrid forms like *gist*, *gust* (Y) in the S.W. dialects of the 13th c. is hard to account for on this supposition.]

guild, gild (gɪld). Forms: *a.* 1 ȝyld, ȝild, ȝeȝyld, 3–4 ȝild, 4–6 yelde, 5 ȝeld, 5–6 yeld, 6 yeald, 7 yeelde, 8 *dial.* yild-. *β.* 4–6 gyld(e, 4–7 gilde, 5 gyylde, geld-, 6 gelde, gyeld, guilde, guylde, 5– gild, 7– guild. [Several distinct formations from the same Teut. root have here coalesced. (1) The forms within initial ȝ, *y* prob. represent mainly OE. *ȝild*, *ȝyld*, (*ȝield*) str. neut., recorded only twice in this sense, but frequent in the senses 'payment, compensation, offering, sacrifice, worship, idol'; corresp. to OFris. *geld*, *ield* money, OS. *geld* payment, sacrifice, reward, OHG. *gelt* payment, offering, tribute, money (Du., G. *geld*, money), ON. *giald* payment, Goth. *gild* tribute:—OTeut. **geldo*ᵐ. (2) OE. had also *ȝeȝyld* str. neut., where the prefix *ȝe-* (see Y- *prefix*) expresses the notion of combined or collective action. This has not been found later than OE., but as the prefix *ȝe-* regularly disappeared in substantives (cf. *reeve*) its representative in the 14th c. would coincide with that of the simple *ȝyld*. (3) The pronunciation with (g) must be due to adoption of, or influence from, the ON. *gildi* str. neut. guild, guild-feast, banquet, also payment, value (Sw. *gille*, Da. *gilde* guild):—OTeut. **gildjo*ᵐ.

In continental Teut. the sense of 'guild' was expressed by a fourth formation from the same root, repr. OTeut. type **gildjôn-* wk. fem., and occurring as MLG., MDu. *gilde* fem. and neut. (Du *gild*), whence mod.G. *gilde*; in Carolingian Latin the word appears as *geldonia*, *gildonia*, explained by *confraternitas*; the later med.Lat. form is *gilda*; OF. had *gilde*, *ghelde*, *gheude*, *jode*, etc., in the senses 'guild, band of foot-soldiers.'

The root **geld-* in these derivatives is prob. to be taken in the sense 'to pay, contribute', so that the sb. would primarily mean an association of persons contributing money for some common object. As, however, the root also means 'to sacrifice, worship', some have supposed that guilds were so called as being combinations for religious purposes, heathen or Christian.

The sense 'member of a guild, guild-brother', was expressed by OE. *ȝylda* and *ȝeȝylda*, MLG. *gilde* wk. masc.; the Teut. word appears in med.L. as *gildō* (also *congildō*, *congilda*), and in OF. *gelde*, *geldon* (with many variants), one of a company (*gelde*) of foot-soldiers.]

1. A confraternity, brotherhood, or association formed for the mutual aid and protection of its members, or for the prosecution of some common purpose.

a. *Primarily* applied to associations of mediæval origin.

The guilds mentioned in OE. pre-Conquest documents fulfilled much the same functions as modern burial and benefit societies, but their objects included the providing of masses for the souls of deceased members, and the payment of *wergild* in cases of justifiable homicide. They had always originally a strong religious element in their constitution. Their meetings were app. usually convivial (cf. ON. *gildi* banquet, GUILD-ALE, and quot. *a* 1109 below). In later times the guilds of this 'social-religious' type underwent development in various directions; some becoming purely religious confraternities, while others acquired secular rights and privileges, eventually developing into municipal corporations.

The *guild of merchants*, *merchant guild* (or *guild merchant*, late OE. *céapmanna ȝild*), an incorporated society of the merchants of a town or city, having exclusive rights of trading within the town, is an institution which in England has not been found before the Conquest; on the Continent the name and thing were older. In many English towns, and in the royal burghs of Scotland, the merchant guild became the governing body of the town; in Scotland the name of 'guild' is still preserved (cf. *dean of guild* s.v. DEAN).

The *trade guilds*, which in England come into prominence in the 14th c., were associations of persons exercising the same craft, formed for the purpose of protecting and promoting their common interests. In some towns the representatives of these bodies superseded the older organizations as the municipal authority. The trade guilds are historically represented in London by the Livery Companies, but these are not ordinarily known as guilds, and retain little of their original functions. The trade guilds of mediæval Europe closely resemble the ancient Roman *collegia*, with which they may perh. have been historically connected.

II. (With lower-case initial.) The coin so called, or its value.

3. a. An English gold coin, not coined since 1813, first struck in 1663 with the nominal value of 20*s.*, but from 1717 until its disappearance circulating as legal tender at the rate of 21*s.* ***double guinea***: a coin equal in value to two guineas. ***spade guinea***: a guinea of the pattern coined 1787–1800, so called from the form of the escutcheon on the reverse.

In 1663 the Royal Mint was authorized to coin gold pieces of the value of 20*s.* 'in the name and for the use of the Company of Royal Adventurers of England trading with Africa'; these pieces were to bear for distinction the figure of a little elephant, and 44½ of them were to contain 1 lb. troy of 'our Crowne gold'. The 20*s.* pieces of the African company received the popular name of *guineas* almost as soon as they were issued, as being intended for use in the Guinea trade, and made of gold from Guinea; and the name was extended to later coins of the same intrinsic value. As silver was the sole standard till 1816, the value of the guinea was from the first subject to market fluctuations, according to the condition of the silver coin, which became so bad that the guinea rose as high as 30*s.* in 1695. In Dec. 1717 it was fixed at 21*s.*, after which it underwent no further alteration. The latest coinage of guineas took place in 1813; the *sovereign*, of the value of 20*s.*, was first issued in 1817.

gule (gju:l), *sb.*^{2} [a. OF. *gule*, *goule*, med.L. *gula Augusti*.

The ulterior etymology is unknown. The Welsh form is *gwyl Awst* (*gwyl* festival, believed to be a. L. *vigilia* VIGIL), but as the med.L. and OF. terms were in continental use, this must be a mere popular etymology. The conjecture that *gula* is a corruption of 'Dies Sancti Petri ad vinc*ula*' is very unlikely, nor is it clear how it can be identified with the Lat. *gula* 'throat'.]

Also 6 guele, 7 gule. [ad. OF. *goules*, *gueules* (F. *gueules*) = med.L. *gulæ* pl., ermine dyed red.

The ulterior etymology is disputed: the word coincidea in form with the pl. of the Fr. and med.Lat. word for 'throat'. If the heraldic sense be the original, the allusion may be to the colour of the open mouth of a heraldic beast. It seems more likely, however, that the heraldic use is tranaferred from the sense 'red ermine', in which case the word may represent some oriental name; but the suggestion of derivation from Pers. *gul*, rose (Hatz.-Darm.), is very improbable.]

1931 L. S. B. LEAKEY *Stone Age Cultures Kenya Colony* xi. 243 In attempting to discuss the relation of the Gumban to cultures in other parts of the world..it should be noted here that the name of this culture has been derived from a Kikuyu term which is applied to-day primarily to a semi-mythical race of small people... In using the word for this culture, I am not referring to this, its primary meaning, but to its present more usual meaning, that is in reference to any people who preceded the Kikuyu. From the moment that I first started excavations, old Kikuyus who visited the camp used to talk of my 'search for the Gumba', and when thinking of a name for this comparatively recent culture the word Gumban seemed to be not inappropriate. **1931** *Times Lit. Suppl.* 20 Aug. 627/2 Coming to the Kenya cultures after the Aurignacian, Mr. Leakey believes that in one of the latest, the Gumban, we may have evidence 'of the contact of a late Stone Age people with one of the early civilizations of the world'. **1957** G. gun (gʌn), *sb.* Forms: 4-6 gonne, gounne, gunne, 5 gownne, gune, 6 gon(e, gonn, goon(ne, *Sc.* gown, 5- gun. [ME. *gunne*, *gonne* (riming with *sonne* = sun); hence already in 14-15th c. the word was adopted as Welsh *gwn*, Irish (also Sc. Gaelic) *gunna*, Anglo-L. *gonna*, *gunna*.

With regard to the ultimate etymology, a suggestion has been made by Prof. Skeat that ME. *gunne* may represent a hypocoristic form of a Scandinavian female name compounded with *Gunn-*. This conjecture receives a strong confirmation from the fact (communicated to us by Mr. W. H. Stevenson) that an account of munitions at Windsor Castle in 1330-1 (Exchequer Accts. Q.R. Bundle 18, no. 34, Pub. Rec. Office) mentions 'una magna balista de cornu quæ vocatur Domina Gunilda'. There are other instances of the practice of bestowing female personal names on engines of war; but there was no distinguished lady named Gunilda (= ON. *Gunnhild-r*; spelt *Gunnild* in Havelok) in the 14th c., and it seems highly probable that this use of the name may have come down from Scandinavian times, when its exceedingly appropriate etymology would be understood (both *gunn-r* and *hild-r* mean 'war'). If *Gunnhildr*, as is likely, was a name frequently given to *ballistæ* and the like, it would naturally, on the introduction of gunpowder, be given also to cannon. Indeed, there is some appearance of evidence that an explosive engine was actually called by this name many years before the earliest recorded instance of the use of gunpowder in warfare. The 'song against the retinues of the great people' in *Pol. Songs* (Camden) 237, which must have been written in the reign of Edw. II, contains the following passage:—'The gedelynges were gedered *Of gonnylde gnoste*; Palefreiours ant pages, Ant boyes with boste, Alle weren y-haht Of an horse þoste'. The correct translation of this passage, which has hitherto been unexplained, seems to be as follows:—'The lackeys were gathered out of Gunnild's spark [OE. *gnást*: see GNAST *sb.*]; the grooms and pages, the varlets with their boasting, all were hatched of a horse's dung'. According to analogy, the regular 'pet-name' in ON. for *Gunnhild-r* would be **Gunna*, which would give *Gunne* in ME.; Rietz *Sv. dial.-lex.*, mentions *Gunne* as a female Christian name still surviving in Swedish country districts. (In Iceland *Gunna* is now common, but it is taken to stand for *Guðrún*.)

The other suggestions that have been made as to the origin of the word are obviously unsatisfactory. The assumed OF. **mangonne*, of which *gonne* has been supposed to be a shortening, is wrongly inferred from *mangonneau* MANGONEL, and is not philologically possible, unless as a back-formation. The F. *gonne*, large cask, does not occur before the 16th c., and is regarded by Littré as adopted from the Eng. *gun*. The conjecture that ME. *gunne* is of echoic origin perh. involves no impossibility, but it has no positive support, and little intrinsic probability.]

gush (gʌʃ), *v.* Forms: 4-5 gosshe, gusche, 6 gus(s)he, guszhe, gousshe, gowshe, 6- gush. [ME. *gosshe*, *gusche*; as the word is wanting in OE. and the other Teut. langs., there is nothing to forbid the supposition that it originated onomatopœically in ME. If it be of pre-English origin, it must app. be a derivative with suffix *k* or *sk* from the wk. grade of one of the Teut. roots **geut-* or **geus-* (see below), in which case its echoic expressiveness would be an accidental development.

The current but phonologically untenable view is that the word is an adoption of some one of the Scandinavian or LG. words representing the Teut. root **geus-* (:*gaus-*: *gūs-*), several of which closely resemble it in sound and sense; cf., for instance, ON. *giósa* str. vb., to spurt, gush, mod.Icel. *gusa* a gush, *gusa* wk. vb., to gush, MDu. *goysen* (Du. dial. *guisen, guizen, goezen*), Du. *gutsen, gudsen* to gush. The root **geus-* (which does not occur in OE.) is usually regarded as derived from pre-Teut. **gheud-* (Teut. **geut-*, OE. *géotan* to pour: see YETE *v.*, also GOTE, GUT) + suffix *t*, according to the phonetic law by which a dental + *t* became in OTeut. *ss*, simplified after a long vowel or diphthong to *s*; the wk. form *gus-* with single *s* being developed analogically.]

b. Of sounds or utterance: Produced in the throat.

By non-phoneticians any mode of pronunciation which is harsh or grating in effect is often supposed to be 'guttural'; with this notion the designation is popularly applied by Englishmen to the German *ch*, but not to *k* or *g*, though technically it belongs equally to them. As a technical term of phonetics, the word was first used to denote the Hebrew spirant consonants ℵ, ה, ח, ע; it is now commonly applied (inaccurately, if its etymological sense be regarded to the sounds formed by the back of the tongue and the palate, as (k, g, x, ɣ, ŋ).

guy (gaɪ), *sb.*² Pl. guys.

1. a. An effigy of Guy Fawkes traditionally burnt on the evening of November the Fifth, usu. with a display of fireworks. Also in full ***Guy Fawkes.***

Guys were formerly paraded about in the streets on the anniversary of the 'Gunpowder Plot' (Nov. 5). They are now more frequently exhibited by children collecting money for fireworks during the days preceding Nov. 5.

The figure is habited in grotesquely ragged and ill-assorted garments (whence sense 2), and was formerly accompanied by other similar effigies (representing unpopular persons), to which the name of 'guys' is often given by extension.

gy, Sc. var. GUY *sb.*[1]; var. GUY *v.*[1] *Obs.*

gy-, in words of Greek etymology, is in this Dictionary marked to be pronounced with (dʒ), in accordance with the general principle that in words of Gr. derivation (but latinized spelling) Eng. pronunciation follows the rule of the Romanic langs. for the 'softening' of *c* and *g*. The pronunciation (dʒ) is now practically universal in the case of those words beginning with *gy-* that have much colloquial currency (*gymnasium*, *gymnast*, *gymnastic*). Most scientific words of Greek etymology beginning with *gyn-* are now usually pronounced with (g) rather than (dʒ); in particular *gynæcology* and its derivatives are in general use with this pronunciation.

The orthoepists of the 18th c. (Sheridan, Nares, Walker) advocate the 'soft' pronunciation in *gymnastic*, but admit that prevailing usage may be against them. All the pronouncing Dicts. of the 19th c. have (dʒ) throughout, exc. Enfield, Jameson, and Cassell's Encyclopædic Dict.; the last-named restricts the 'hard *g*' to those terms of science and of classical antiquities 'which have not passed, and probably will not pass, into general use'.

gyrfalcon ('dʒɜ:ˌfɔ:lkə n, -ˌfɔ:k(ə)n). Forms: 4–9 jer-, 4, 8– gyr-, (4 gere-), 5–7 gier-, jar(re-, (5 gire-), 4– gerfalcon, etc. (See forms of FALCON.) [a. OF. *gerfaucon*, also *gerfauc* (mod.F. *gerfaut*) = Pr. *girfalc-s*, Sp., Pg. *gerifalte*, It. *girfalco*, *girifalco*, med.L. *gero-*, *giro-*, *gire-*, *gyrofalco*, MHG. *gir-*, *gervalke* (mod.Ger. *gier-*, *geier-*, *gerfalke*), Du. *giervalk*, ON. *geirfálki*.

A compound of the word which appears in Eng. as FALCON; the origin of the first element is disputed, but the prevailing view both among Germanic and Romanic philologists now is that, while the recorded forms in the Teut. langs. are adopted from Fr., the ultimate source is the OHG. *gîr* vulture (MHG. *gîr*, mod.Ger. *geier*), f. the root **gîr* in OHG. *giri*, *gîri* greedy. The suggestion that the med.L. *gyrofalco* is derived from *gȳrus*, *gȳrāre*, and refers to the 'circling' movements of the bird in the air, was made by Gerald de Barri (Giraldus Cambrensis) as early as 1188 (*Top. Hib.* ed. Brewer, I. xiii). A treatise on hunting by the Emperor Frederic II (*d.* 1250) contains a passage (II. iv. 152, ed. 1596) in which the word is said to be either from the Gr. κύριος, lord, or from the Gr. ἱερός sacred. The latter suggestion was prob. based on the current term *falco sacer* denoting a kind of hawk; but according to modern scholars *sacer* in this use (= Fr., Sp., Pg. *sacre* sb.) does not mean 'sacred', but is an adoption of the Arabic *çaqr*. In the 16th c. *hierofalco* was adopted by ornithologists (Aldrovandus, Gesner) as the correct Latin form, probably from the observation that It. *ger-* sometimes represents L. *hier-* (as in *gerarchia* hierarchy); and it is still used as the scientific name of a sub-genus of the genus *Falco*. The view of some recent etymologists, that OF. *gerfaucon* represents a popular L. **hierofalco*, and that the first element of this is from Gr. ἱέραξ hawk, is very improbable.]

In early use, a large falcon, esp. one used to fly at herons; now, any large falcon of the northern regions; esp. the white gyrfalcon of Iceland (*Falco islandus*).

gyroscope ('dʒaɪərəskəʊp). *Dynamics.* [ad. F. *gyroscope* (Foucault, 1852): see GYRO- and -SCOPE.] **a.** An instrument designed to illustrate the dynamics of rotating bodies, and consisting essentially of a solid rotating wheel mounted in a ring, and having its axis free to turn in any direction. Also used, in various modifications or in conjunction with other equipment, to provide a horizontal or vertical reference direction (as in the artificial horizon and the gyro-compass), to stabilize ships, mono-rail vehicles, etc., and to measure angular velocity and angular acceleration (as in the turn-and-bank indicator and other navigational devices).

The form of this apparatus invented by Foucault is contrived so as to render evident the rotation of the earth, through the tendency of the wheel (being free from the influence of disturbing forces) to maintain its rotation in a fixed plane independently of the earth's motion.

1856 *Amer. Jrnl. Sci. & Arts* Ser. II. XXI. 119 Foucault placed between the poles of a strong electro-magnet the solid of revolution belonging to the gyroscope. **1857** *Chambers's Jrnl.* 30 May 351/2 To overcome it [*sc.* rolling and pitching]..the professor invented a balanced frame, with free axes for rotation, somewhat on the principle of the gyroscope, which..remains uninfluenced by the..movements of the ship. **1862** H. The alliteration in ME. poetry shows that the word was originally pronounced with initial (g), and from the spelling *guive* it would appear that this pronunciation continued until the 18th c.; indeed, it is indicated in the pronouncing Dicts. of Sheridan (1780) and Scott (1797). The now prevailing pronunciation with (dʒ) is due to misinterpretation of the graphic form of a word that had become obsolete in oral use. The form points to an OF. **guive* (spelt *give* in *French Chron. Lond.*, 14th c.); Prof. Skeat suggests that this may represent an adoption of some derivative of the Teut. root **wīþ-* (OHG. *wîfan* to wind round, LG. *wîp*, a straw-band). But the absence of any record of the word in continental OF. constitutes a serious objection to this conjecture. Can AF. *guive* be an adoption of the synonymous ME. and OE. *widde*, the initial *w* being represented by *gu-*, and the unfamiliar Eng. dental spirant represented by *v* ? If this suggestion be correct, Layamon used both the Eng. and the Fr. form of the word; cf. with quot. *c* 1205 below the following (line 22833) 'Nimeð me þene ilke mon, and doð wiðde an his sweore'.]

H

H (eɪtʃ), the eighth letter of the Roman alphabet, ancient and modern, representing historically the Semitic ⊟, *Heth* or *Kheth*, through the Greek **H**, *Heta*, *Eta*, originally the eighth, but, in the later Greek alphabet, after the omission of ϝ (see F), the seventh letter. The Semitic letter represented a laryngal or guttural spirant, or a rough aspirate, and it was with the aspirate value that the letter was originally used in Greek and passed thence into Roman use. (In the later Greek alphabet, H was used as a vowel, to express long *ē*, which had previously not been distinguished from short *e*: see E.) When the Roman alphabet was applied to the Germanic languages, H was used initially for the simple aspirate or breath-sound, which had arisen out of a pre-Germanic or Aryan *k*, through the stages of guttural aspirate (kh), and guttural spirant (x); medially and finally *h* was put for the guttural spirant itself, which, in later times, came to be written *gh* or *ch*: thus, Gothic *hauh*, OHG. *hôh*, OE. *héah*, mod. English *high* (*gh* mute), Scotch *heich*, Ger. *hoch*. In Old English, *h* occurred not only before the vowels, but also before the consonants *l*, *n*, *r*, *w* (representing the pre-Germanic *kl-*, *kn-*, *kr-*, *kw-*, or *q-*), as in *hláf* loaf, *hnecca* neck, *hræfn* raven, *hwá* who; it now stands initially only before vowels. Its power is that of a simple aspiration or breathing, with just sufficient narrowing of the glottis to be audible before a vowel. It is also used to form consonantal digraphs (*sh*, *th*, etc.) with simple sounds; and it is often silent, or merely lengthens a preceding vowel.

The name *aitch*, which is now so remote from any connexion with the sound, goes back through ME. *ache* to OF. *ache* = Sp. *ache*, It. *acca*, pointing to a late L. **accha*, **ahha*, or **aha*, exemplifying the sound; cf. It. *effe*, *elle*, *emme*, etc. (The earlier L. name was *ha*.) The plural occurs as *aitches*, *aches*, *hs*, *h's*.

In late Latin, and in the Romanic languages, the aspirate was no longer pronounced, and consequently often not written; in modern Italian it is entirely omitted, as in *eretico*, *istorico*, *orribile*. In Old French similarly the mute *h* was originally not written, and it was in this form that many Old French words, such as *abit*, *able*, *eir*, *erbe*, *eritage*, *onest*, *onor* or *onur*, *ure* or *oure*, *ympne*, were originally adopted in English. From this stage we derive the still existing forms *able*, *ability*, *arbour* (= *erbere*), *ostler*. But at a later period, imitation of the Latin spelling, by scribes who knew that language, gradually led to the restitution of *h* in the writing of most of these words in French, and thence also in English. In French, the *h*, though thus artificially reinstated in spelling, remained mute; but in England it was gradually, after the usage of the native words, restored in pronunciation, so that at the present day only a very few words, viz. *heir*, *honest*, *honour*, *hour*, with their derivatives, remain with *h* mute; though others, such as *herb*, *humble*, *humour*, were so treated very recently, and are by some people still; and *hostler* (also spelt *ostler*) is so pronounced by the majority. A trace of the former muteness or weakness of *h* in other words is also seen in the still prevalent practice of using *an* before words with initial *h*, not accented on the first syllable, as *heretical*, *historical*, *humane*, *hypotenuse*, and in such archaic forms as 'mine host', and the biblical 'an Hebrew'. In the ME. period, during which *h* was being gradually reinstated in words from Old French, these show great variety of spelling, the same word appearing now with, and now without *h*; this uncertainty reacted upon other words beginning with a vowel, so that these also often received an initial *h* (due probably in some instances, as *habundant*, to a mistaken notion of their etymology). This spelling has been permanently established in the words *hermit* and *hostage*, among others.

In Old English, as in the Teutonic languages generally, initial *h* was strongly and distinctly aspirated. But early in the Middle-English period it was dropped in pronunciation and writing before *l*, *n*, and *r*. The old *hw* was from the 12th c. commonly written *wh*, sometimes *w* only, in Scotch *qwh-*, *quh-*; indicating a variety of pronunciation (see W). Before vowels, in words of Old English or Norse origin, *h* has been regularly retained in the standard spelling and pronunciation: but in many English dialects, especially those of the midl. and southern counties (not in Scotland, Ireland, or in the United States), the aspirate has disappeared as an ordinary etymological element, and is now employed only with other functions, viz. to avoid hiatus (e.g. *the egg*, pronounced *the-h-egg*), and especially in the emphatic or energetic utterance of a syllable with an initial vowel; being then prefixed without distinction to words with or without etymological *h*; thus *horse*, *ass*, usually *ôss*, *às*, emphatically (or after a vowel) *hòss*, *hàss*. In earlier periods, these dialectal habits naturally affected the written language of literature, where their influence was reinforced by the uncertainty that prevailed as to initial *h* in words of Latin-French origin; so that during the Middle-English period, and down to the 17th c., we find numerous instances of the non-etymological absence or (more often) presence of initial *h* in native words also. These characteristics are not confined to English: some modern Dutch and Flemish dialects, especially those of Zealand, Flanders, and North Brabant, have entirely lost *h* as an etymological element, and employ it to avoid hiatus, and to impart emphasis, exactly like the English dialects; while in Old High German, Middle Low German, Middle Dutch, and, above all, Middle Flemish literature, the non-etymological absence and presence of initial *h* is even more marked than in Middle English. In this Dictionary, some of the chief forms found in earlier use with adventitious initial *h* are mentioned in their alphabetical order, with a reference to their proper spelling, especially when this is not seen by simple omission of the *h*; but in other cases it is to be presumed that, when a ME. word in *h* is not entered here, it will be found in the form without *h*.

In recent times, the correct treatment of initial *h* in speech has come to be regarded as a kind of shibboleth of social position; this has resulted in the cultivation of the educated usage in many quarters where it is not native. But even in educated pronunciation, there are cases in which *h* is usually mute, e.g. at the beginning of a syllable after certain consonant groups, as in ex*h*aust, ex*h*ortation, and in such suffixes as *-ham*, *-hope*, in *Chatham*, *Clapham*, *Durham*, *Greenhope*, *Stanhope*, *Tudhope*, *-herd* in *shepherd*, as well as in the pronouns *he*, *his*, *him*, *her*, when unemphatic and as it were enclitically combined with the preceding word, as in 'I met-*h*im on-*h*is horse'. In the corresponding neuter pronoun *it*, originally *hit*, in which the unemphatic use predominates, the *h* was long ago dropped in writing as well as speech. (But in Scotch the emphatic form is still *hit*.)

After a vowel, *h* is regularly silent, and such a vowel being usually long, as in *oh*, *ah*, *bah*, *hurrah*, the addition of *h* (so usual in modern German) is one of the expedients which we have for indicating a long vowel in foreign or dialect words. The silence of *h* in certain positions contributed to the currency of such spellings as the obsolete *preheminence*, *proheme*, *abhominable*.

By the combination of *h* with consonants, numerous digraphs are formed for the expression of simple sounds; the origin of this goes back to the ancient Greek alphabet, which used PH, TH, KH, for the aspirated consonants, which were afterwards provided with single symbols *Φ*, *Θ*, *X*, and sank into simple spirants. In Latin the digraphs were retained, and thence *th*, *ch*, and occasionally *ph*, were taken to represent German spirants or aspirates. In Old English, which had þ, ð, for the sound or sounds represented on the continent by *th*, these digraphs had little currency until after the Norman Conquest, which introduced *th*, *ch*, *gh*, and sometimes *yh*, for certain English sounds, and substituted *wh* for OE. *hw*; the development of a simple sound (ʃ) from the OE. combination *sc*, led, through *sch*, to the digraph *sh*; *ph* and *rh* (pronounced f and r) were adopted from Latin as the representatives of Gr. *φ* and *ῥ*; in more recent times *kh* has been used to express Slavonic and Semitic guttural spirants; *bh*, *dh*, *gh*, *ph*, *th*, *kh*, to represent Sanskrit and Indian aspirates, or other alien sounds; and *zh* (on the analogy, *s* : *z* :: *sh* : *zh*) for the phonetic representation of French *j* in *déjeuner*, symbolized in this Dictionary by (ʒ). (For the history and use of these digraphs, see under their respective initial letters, C, G, etc.)

hab (hæb), *adv.* (*sb.*) *Obs.* exc. *dial.* [Known in the phrases *hab nab, hab or nab*, from *c* 1550. Conjectured to represent some part of the verb HAVE, presumably the pres. subj., OE. *hæbbe*, early southern ME. *habbe*, in conjunction with the corresp. negative form OE. *næbbe*, ME. *nabbe*; the alternative phrase *habbe he* (*ich, we*, etc.), *nabbe he* (*ich, we*, etc.) = 'have he (we, etc.) or have he (etc.) not', accounts fairly for the sense, and answers phonologically; but there is a long gap in the history, between the general disappearance of the *habbe* forms of the verb in ME. and the first examples of *hab nab*.

hab ȝe = have ye, if ye have, occurs in *Sir Ferumbras c* 1380; *(h)ab* is still a form of *have* in modern Devonshire and W. Somerset dialect (where also the phrase *hab or nab* is in everyday use), but is exemplified by Elworthy only in *(h)ab-m*, for *have'en* = 'have him', where it may be a modern phonetic change, since the dialectal change of *vn* to *bm* is widely spread, in *eb'm* even, *seb'm* seven, and the like.]

[a. OF. *habit*, *abit* (12th c. in Littré) = Pr. *abit*, *habit*, It. *abito*; ad. L. *habitus*, noun of action (*u*-stem), from *habēre* to have, *refl.* to be constituted, to be.]

The sense development, as seen in Latin and the modern languages taken together, is thus: *orig.* Holding, having, 'havour'; hence the way in which one holds or has oneself, i.e. the mode or condition in which one is, exists, or exhibits oneself, *a*) externally; hence demeanour, outward appearance, fashion of body, mode of clothing oneself, dress, habitation; *b*) in mind, character, or life; hence, mental constitution, character, disposition, way of acting, comporting oneself, or dealing with things, habitual or customary way (of acting, etc.), personal custom, accustomedness. This development was largely completed in ancient Latin, and had received some extension in OF., before the word became English; in our language, senses were taken, from time to time, from Fr. or L., without reference to their original order of development; hence the chronological order in Eng. is in no way parallel to the original; and the arrangement below is only partly chronological. In mod.F. the word is narrowed down to our branch I, other senses being supplied by *habitude*; thus Eng. 'habit' is co-extensive with the two French words, and its chief sense corresponds not to F. *habit* but to F. *habitude*.

[Not recorded in OE.; but the various ME. forms *hechele*, *hetchell* (*c* 1300), *hekele* (*c* 1440), *hakell* (1485), and the later *hatchel*, point to OE. **hacule*, **hęcile*. It is now agreed by French and Dutch scholars that MDu. *hackeneie, hackeneye*, Du. *hakkenij*, to which some have referred the French word, was merely adopted from the French, thus disposing of conjectures as to the derivation of the word from MDu. *hacken* to hoe. The French *haquenée* and its Romanic equivalents had probably some relationship with OF. *haque*, OSp. and Pg. *faca*, Sp. *haca* 'a nag, a gelding, a hackney' (Minsheu): but, although the word-group has engaged the most eminent etymologists, its ulterior derivation is still unknown.]

hæma-, hema-, repr. Gr. *αἷμα* blood; sometimes improperly used as combining form instead of the etymologically regular HÆMATO- or HÆMO-. For such words in *hæma-* see HÆMO-.

These erroneous forms in *hæma-* are nearly all of French origination. Littré has *hémachroïne*, *-dromomètre*, *-dynamique*, *-statique*; to French authors are also due *hémaphéine*, *hematherma*, etc.

In words derived from Gr. *αἷμα*, the spelling *he-* is favoured in the United States, but is rarely used in Great Britain, except in *hematite*, where it is the prevailing form in industrial and commercial use, and in *hemorrhage* and *hemorrhoid*, in which *hæ-* is however more usual.

‖**haiku** ('haɪku:). Also **haikai, hokku**. [Jap.] A form of Japanese verse, developed in the mid-16th century, usually consisting of 17 syllables and originally of jesting character; an English imitation of one.

The *hokku* was originally the opening hemistich of a linked series of *haiku* poems, but is now synonymous with *haiku* and *haikai*. An earlier meaning of *haikai*, an abbreviation of the phr. *haikai no renga* ('jesting linked-verse'), was a succession of *haiku* linked together to form one poem.

1899 W. G. ASTON *Hist. Jap. Lit.* iv. 289 In the sixteenth century a kind of poem known as Haikai, which consists of seventeen syllables only, made its appearance. **1899** *Trans. Asiatic Soc. Japan* XXVII. iv. p. xiv, The *hokku* must be an exceedingly compact bit of word and thought skill to be worth anything—as literature. **1902** *Ibid.* XXX. ii. 243 The poets of Japan have produced thousands of these microscopic compositions... Their native name is *Hokku* (also *Haiku* and *Haikai*), which, in default of a better equivalent, I venture to translate by 'Epigram', using that term.. as denoting any little piece of verse that expresses a delicate or ingenious thought. **1904** *Westm. Gaz.* 19 Apr. 10/1 The perfect haikai is a Lilliputian lyric of but three unrhymed lines of five, seven, and five syllables respectively —seventeen in all—in which is deftly caught a thought-flash or swift impression... An example.. is the following: The west wind whispered And touched the eyelids of Spring: Her eyes, Primroses. **1957** C. BROOKE-ROSE *Lang. Love* 47 Her translations of *haiku* were elegant. **1969** *Radio Times* 15 May 9/1 A sequence of twenty-one sonnets and two haiku on the first American landing in Japan in the mid-nineteenth century.

This is called the 'halsh-band', and when the band is tied the knot is said to be 'halshed'... The 'halsh' is also—in the case of a necktie in the form of a bow, for example—that part in the centre that runs in a vertical or slightly oblique direction, embracing the whole bow... Saddlers also use the word, and possibly it is known in the woollen and worsted industries.
